

# LASER SCANNER ZLDS202WELD

## MAIN FEATURES

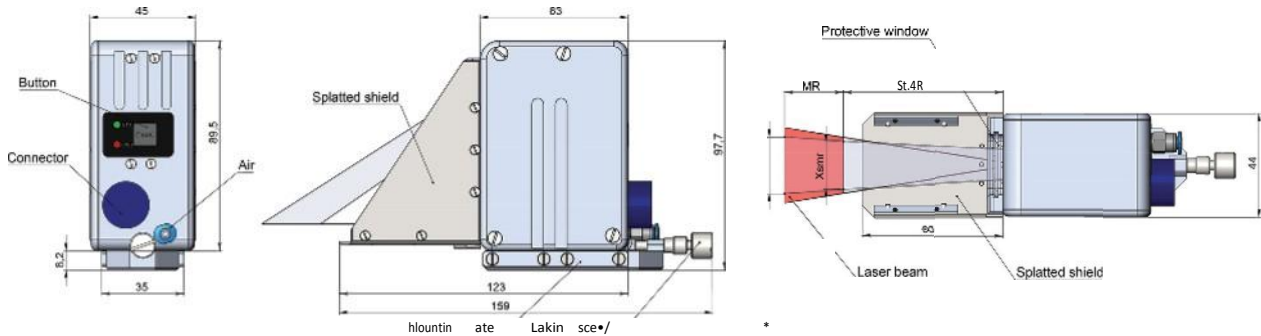

- Laser scanners and software for welding robots
- Recognition, tracking and measuring in real time
- B Various protocols for communication with robots

Laser Scanners ZLDS202 Weld Series. Working ranges

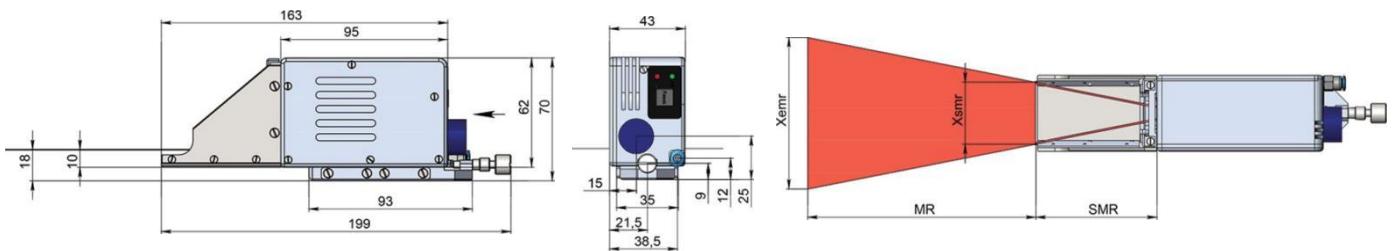

Range	s'R	MR,	Xsmr	Xemr	Laser
25-65-21-25	65	25	21	25	Class 2N
130-70-35-86	70	130	35	86	
250-90-65-180	90	250	65	180	

For the rest parameters see "Overall specifications" in the previous page.

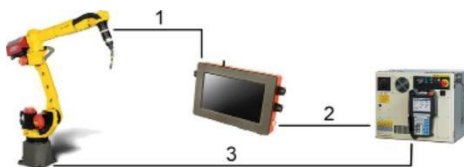

ZLDS202Weld-65/25-21/25 and ZLDS202Weld-90/250-65/180

ZLDS202Weld-70/130-35/86

### STEP 1

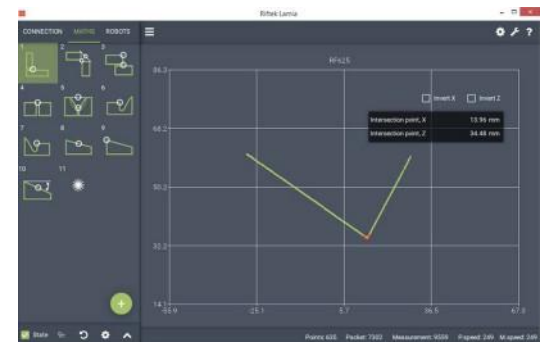

Connect equipment in accordance with functional diagram:

1. Connection between the scanner and ZSY Controller (or PC) with ZSY Lamia
2. Connection between ZSY Controller (or PC) with ZSY Lamia and the robot controller
3. Connection between the robot and the robot controller

### STEP 2

Select Template

### STEP 3

Select Robot Exchange Protocol

### STEP 4

START WORKING

HOW IT WORKS
